

Project "HalOS"

Tools and Software

To complete the "HalOS" project several tools were needed. Here you will find a list of each and what it was used for. You will also find the cost I incurred to use it.

Name	Description	Price
GCC	C compiler	Free
NASM	IA-32 assembler	Free
Doxygen	A documentation tool that searches source code to produce reference documentation	Free
Bochs	IA-32 emulator	Free
Microsoft SourceSafe	Source control system	Free (VTC has an MSDN license for campus)
Microsoft Viso	Modeling Tool	Free (VTC has an MSDN license for campus)
Microsoft Office	Tools to create presentations and these documents	I currently own a personal MSDN license.

As this diagram show, this project cost 0.00 dollars.
